DIDSBURY, ALBERTA, THURSDAY, APRIL 16, 1931

\$2.00 per Year. 5 cents a copy

## Didsbury Horses Make Successful Showing

The carload of Didsbury horses that were taken to the Calgary and Edmonton Horse Shows returned on Sunday after a very successful showing in the rings at both cities.

At Calgary, W. J. Fulkert with his five-gaited Kentucky horses took four out of the five prizes awarded in the open event of that class. "The Dane" taking 1st, "Maypole" 2nd, "Laura La Plante" 3rd and "Ruby Fan" 5th.

In the class for Five-gaited Juniors, Fulkert won 1st and Mr. Ira Leungood 3rd prize. Mr. W. E. Reider took three first prizes with his Welsh ponies. Mr. Fulkert also won a second with "Peggy" in the jumpers' class under 15 hands.

At the Edmonton Exhibition the Fulkert horses were even more successful and his string of beautiful horses gave a performance every evening during the show. The Edmonton Bulletin had this to say about the exhibition:

"One of the high-lights of the evening was the exhibition of five-gaited Kentucky horses, owned and exhibited by W. J. Fulkert, of Didsbury. This drew round after round of applause from the spectators and promises to be one of the high-lights of the whole show."

The performance which drew the greatest applause was a "cakewalk"

## St. Cyprian's A.Y.P.A. Makes Presentation

The setting of the A.Y.P.A. of St. Cyprian's Church was held in the home of Mr. and Mrs. W. Pitt on Thursday evening last. After the business meeting the young folk were joined by the elder members of the church and a social evening of whist and dancing was much enjoyed.

During the evening, Mr. W. B. Harber on behalf of the members of the Association presented Rev. W. J. Archer, who is leaving the district, with a medal as a small token of appreciation for the work he had done. Mr. Archer had been instrumental in organizing the A.Y.P.A. which had been very successful and all the members were sorry to lose him at this time.

by "Laura La Plante."

In the show-ring, Fulkert won all four prizes awarded in the five-gaited class and won 1st and 2nd in the combination riding and driving class, against 13 entries. He also won first prize in the open jump with "Peggy."

Mr. W. E. Reider was also successful with his ponies, winning first prize with "Pepper" in a by-class, while "Bae Down" took third in the driving class.

Mr. E. Knott assisted in the exhibition and care of the horses.

## LOCAL & GENERAL

Mr. J. Eubank, of Edmonton is visiting with his sons this week.

Mr. J. A. McGhee paid a visit to Edmonton on Tuesday.

Miss Esther Dickson spent the Easter holiday at the home of Mr. and Mrs. L. B. Dickson.

Mrs. Alexander, of Calgary is visiting with Mr. and Mrs. W. J. McCoy.

The C.G.I.T. Juniors will give an afternoon tea in Knox Church this Saturday, April 18th from 2:30 to 6 p.m. Everybody welcome.

Preparatory services and reception of new members will be held in Knox Church this (Thursday) evening.

Mrs. E. Page leaves next week for a trip to England. She sails on the "Duchess of Atholl" from Montreal on April 29th.

English Watches, Grandfather Clocks, and Chimes. Everything Ancient and Modern. Bring it to W. Monteith, North End Jeweller.

Richard Barthelmess in "The Lash," all-talking picture at the movies Thursday, April 23rd. Regular prices.

A General Hospital for sick Watches, Clocks, Phonographs, Sewing Machines, Etc., Etc. In front corner of Club Launch. All work guaranteed.—Adv.

Rev. A. E. Hayes is preparing a series of sermons on "Current Christian Thinking," the first of which will be given next Sunday evening at Knox Church.

Jackie Coogan and Mitzi Green in "Tom Sawyer" at the Opera House on Monday, April 20th. Prices 25c & 50c. A "Yo-Yo" will be given FREE to every child who attends.

At the reception of members in the Evangelical Church last Sunday morning, ten new members (six adults and four juniors) were added to the church roll. Some others yet are expected to join in the near future, both here and at the Sunny-slope appointment.

## Train Wrecked Near Edson

Twenty-three passengers and six trainmen were injured on Sunday when a C.N.R. Flier left the track near Edson. It is thought a broken rail was the cause of the mishap.

When the train struck the track obstruction, the passengers were sleeping. Many were hurled from their berths. The heavy mountain locomotive and baggage car remained on the rails. The colonist car left the rails but remained upright, while the day coach, tourist sleeper, diner and a Pullman car plunged down a 30-ft. embankment, overturning as they went. Other sleeping cars left the rails but remained upright. Only the fact that the cars were of steel construction saved greater casualties.

## Mountain View Council Meeting

The regular meeting of Mountain View municipal council was held on Saturday last and all the councillors were in attendance.

The matter of the road program for the season was taken up and while there will be some retrenchment this year on new construction, considerable road will be built.

The income grant this year has been set at \$1750 and a requisition for capital grant has been made to the department. The rate of pay for roadwork this season was set at 25 cents per hour for team, 25 cents for teamster and 35 cents for a single man.

Councillors Archer and Saunders were appointed to supervise the Didsbury market road and Councillors Fleury and Jensen will supervise the Olds market road.

In the matter of seed grain relief it was pointed out that there was no need of relief in this district and no action was taken. The other business transacted was mostly of a routine nature.

## BIRTHS

At Didsbury General Hospital

To Mr. and Mrs. A. Nelson on April 5th, a son.

To Mr. and Mrs. D. C. Archer on April 10th, a son.

To Mr. and Mrs. W. Novak on April 15th, a son.

## Coming Events

Don't forget the Junior C.G.I.T. Tea, Knox Church this Saturday afternoon, 2:30 to 6 p.m.

## Farewell Party To Mr. W. Leadbetter

The members of the Canadian Legion together with their wives and friends gave a farewell party on Friday evening last to Mr. W. Leadbetter, who is leaving the district.

Mr. J. H. Lowrie, president of the local branch expressed the regret of the members at Mr. Leadbetter's leaving and wished him an enjoyable holiday. He hoped that on his return to Canada, Mr. Leadbetter would find time to visit them occasionally. Mr. Leadbetter made a suitable reply.

The evening was spent in cards, games, music and dancing. Miss Saugstad contributed several songs and Mr. C. Mortimer gave a recitation "Dragon Dan McGrew."

Mr. Leadbetter, who had charge of the Alberta Pacific Elevator for a number of years is leaving for a few months' holiday in England and on his return expects to be transferred to another point. He sails next week from Montreal on the "Duchess of Atholl."

## WEDDING

FULKERTH—MOON

A very pretty wedding was solemnized in the study of Knox United Church, Calgary at 3 p.m. on April 8th when Freda, eldest daughter of Mr. W. C. Moon, of Didsbury was united in marriage to Jesse Bigelow Fulkert, eldest son of Mr. J. W. Fulkert, also of Didsbury. Rev. G. A. Dickson performed the ceremony. The bride was becomingly gowned in mauve satin with satin slippers and picture hat to match.

The happy couple will reside on the groom's farm east of Didsbury. "Pioneer" Want Ads. bring results

### Reckless Motor Driving

With the approach of spring the time draws near when once again the roads and highways of the country will be thronged with tens of thousands of automobiles and the streets of our larger cities jammed with traffic. Soon tourists will again be in our midst, while week-end trips from our centres of population to summer resorts and other vacation spots will engage the attention of the residents of all urban and many rural sections.

Is the result to be the hanging up of another new high record number of fatalities arising out of automobile accidents? In 1931 to provide another dark spot on our much vaunted civilization with as much recklessness in automobile driving and reckless driving as were recorded in 1929? Are the more and better highways being provided all over the country to have the tragic outcome of steadily adding to the death toll because people using such better roads exercised less care in operating their cars?

Recent figures published for the city of Regina show a very large increase in the number of car accidents reported in 1930 as compared with previous years, and what is true of Regina is true of practically every city in Canada and the United States.

A United States magazine, in a recent issue, dealt with the rising death toll due to reckless automobile driving across the line. While these figures apply only to the United States, they disclose a state of affairs which is equally applicable to Canada. A few of the facts established may well be quoted.

Motor accidents in the United States, in 1930, killed 32,500 people, and injured more than 900,000—in other words, one million victims. More than 2,000 little children under five years of age were killed, and more than 45,000 were injured. The magazine notes that the World War did not take a greater toll of American lives in battle.

Remarkable as it may seem, this magazine considers that the most encouraging aspect of this appalling loss lies in the fact that recklessness was its principal cause, saying, "If carelessness and over-confidence kill and injure so many, carefulness and consideration can prevent such losses."

Evidence goes to show that the majority of accidents occurred on straight and dry roads, in broad daylight, with experienced and mature drivers at the wheel. In an overwhelming majority the machine functioned properly, the man was at fault. He took unjustifiable chances.

In a striking analysis of accident reports from forty States, a well known insurance company dispels many cherished illusions on this subject. Contrary to a common impression, women were proved to be safer drivers than men. Young men at their best physical development were the worst offenders.

Improper driving and nothing else was responsible for more than two-thirds of all the deaths and injuries recorded in 1930. Speeding, driving on the wrong side of the road, and failure to grant right-of-way, all evidences of improper driving, accounted for 68 per cent. of the accidents.

Other violations of the laws as well as of common sense took a heavy toll. Failure to signal caused the deaths of 490 people, and accounted for the injuries of 48,928. More than 80,000 accidents resulted from motorists driving off the roadway. The biggest single cause of accidents, however, was the improper attempt to take the right-of-way from some other traveler—selfishness, hogwashness.

As might be expected, weekend driving is most hazardous. Sunday is the worst day by far, and Saturday is next.

There was a time when defective construction of cars, poor brakes, etc., were held responsible for most accidents. Today the lack has been well established that at drivers we are not so good as the cars we operate. Men have learned to operate ships at sea safely. The records of the railroads are marvellous. Where safety is the goal, airplanes have achieved miracles in perfecting human life. In other words, we can operate high-powered, fast moving machines if we put our minds to it.

What we have to learn is that safety is more important than speed. Drivers must be made to realize that they are steering three or four thousand pounds of steel in swift momentum, the possible destructive power of which is enormous.

Safety is worth more than anything else. The maiming, and the killing, and the destruction of millions of property must be stopped and we, the average drivers, can do it.

## La Grippe and "Flu" are Spreading

"Flu" First Appears as a Sore Throat, but Gains Tremendous Headway in Six Hours

### AN EFFECTIVE TREATMENT DESCRIBED

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop penetrates deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Experienced mothers know how valuable Nerviline is for Coughs, Colds, Sore Throat, and the little ailments that arise in every family. Nerviline in most homes is called "Mother's Best Friend." 35c at all dealers.

### World's Leading Flyer

French Aviator Who Awarded Holding Five World Records

Dieudonne Coste, Paris-to-New York flyer, has been designated the world's premier aviator by the awards committee of the International League of Aviators.

Mrs. Amy Johnson, who flew from London, England, to Australia, was given highest honors among women flyers. She and Coste were received at the Elysée Palace by President Doumergue and presented with silver cups at a formal ceremony.

Coste's only rival at the committee session was Wing Commander Charles Kingsford-Smith, the Australian "ace," and the Frenchman was chosen because he holds five world records in addition to the accomplishment of his Atlantic flight.

The committee also ordered plaques to be struck to honor Mrs. Victor Bruce, Marysée Bastie and Mrs. Charles Lindbergh.

Dr. Hugo Eckener was designated the world's premier dirigible pilot.

## Magnesia Best for Your Indigestion

Most people who suffer either occasionally or chronically from gas, sourness and indigestion, have now discovered a simple and effective remedy, Magnesia. It is not a cathartic, it does not irritate the stomach, and it does not produce any of the harmful effects of other laxatives. It is a natural product of the earth, and it is the only one that is so effective in relieving the stomach. It is the only one that is so effective in relieving the stomach. It is the only one that is so effective in relieving the stomach.

### Life Insurance More Popular

People Taking Advantage Of Attractive Features Offered

One of the outstanding developments in the recent financial history of the United States is the remarkable growth of life insurance. The application of the principle of group life insurance to institutions and industries has made life insurance available to large numbers of persons who have never before carried any form of life insurance. The individual amounts of insurance in these cases are usually small, ranging from \$1,000 to \$5,000. But there has also been a marked increase in the number of large policies written. In 1923 there were 38 persons whose lives were insured for \$1,000,000 or more. In 1929 there were 323 persons carrying life insurance for that amount—Wall Street Journal.

Miller's Worm Powders act so thoroughly that stomachic and intestinal worms pass from the child without being noticed and without inconvenience to the sufferer. They are painless and perfect in action, and at all times will be found a healthy medicine strengthening the infantile stomach and maintaining it in vigorous operation, so that, besides being an effective vermifuge, they are tonical and health-giving in their effects.

### Hatchery Approval Policy

Big Saving To Canadian Farmers This Year Is Forecast

A saving to Canadian farmers this year of \$200,000 is forecast for the hatchery approval policy of the Department of Agriculture, according to the Minister, Hon. Robert Weir. Under the scheme, 134 hatcheries are operated, producing about 5,000,000 baby chicks a year, which are available to farmers at low prices. Records show these chicks to have a low mortality rate.

Drives Asthma Like Magic. The immediate help from J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor reaching the most remote passage of the affected tubes, brings aside the trouble and opens a way for fresh air to enter. It is sold by dealers throughout the land.

### More To the Point

Clerk: "When you leave, sir, don't forget the sign. Have you left anything?"

Guest: "It should be changed to 'Have you anything left?'"

The CANADA STARCH CO., Limited MONTREAL

### Unusual Operation

Piece Of Dental Plate Is Removed From Lung Of Patient

A piece of dental plate, measuring 1 1/2 inches by 1/2 inch and holding three teeth, was taken from the lung of Victor Brander, Cochrane lumber merchant, by Dr. S. B. McMillan, of the Lockwood Clinic in Toronto, after one of the most unusual operations in medical records.

Four months ago Brander was seized with a violent coughing spell, and, without knowing it, bit upon the metal dental plate. The broken portion passed down his throat and lodged in his lungs.

The bronchoscope, instrument used for retrieving objects from the lungs, was used and it took more than two hours of very delicate manipulation by the doctor before he was successful.

### Much Capital Invested

Biscuit, Confectionary, Chocolate and Cocoa Industries Have 281 Establishments

According to the latest figures—those covering the year 1929—issued by the Dominion Bureau of Statistics, with reference to the biscuit, confectionary, chocolate and cocoa industries of Canada, the amount of capital invested that year was \$55,329,902; the number of persons employed, 13,072; salaries and wages amounted to \$12,746,876; cost of materials \$27,717,880, and value of products \$62,492,801. There are 281 establishments in all.

### Felt Tired Out All Day

Could Not Sleep at Night

Mrs. Akhamond Lalonde, 2181 St. James St., Montreal, Que., writes:—"After a spell of the gripple I was left very nervous, and felt drowsy and tired out all day, and could not sleep at night. I was also troubled with my heart and did not feel at all like working. I was told about Milburn's Heart and Nerve Pills and after taking four boxes I was completely relieved of my trouble, and can recommend your Pills to everyone."

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co. Ltd., Toronto, Ont.

Price 50c a box

### Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Appleford Paper Products LIMITED HAMILTON ONT.

## Greenhouse Grain At Ottawa Yields Two Crops A Year And Facilitates Research Work

About the end of April wheat harvesting will begin at the Canadian Government Experimental Farm at Ottawa in greenhouses.

Greenhouse grain is essentially a novelty in Canadian farming practice, but it is one of the most important and significant developments of recent years in connection with cereal research. The cereal greenhouses were built in order to complete two years' research work in one year. During the hours of darkness and on dull days a powerful electric light system supplies the light essential to quick growth.

"We are two years ahead in our work since the new greenhouse went into operation—in other words we know as much now about the varieties we are developing at the present time as we would have known under the old system in 1933," said L. H. Newman, Dominion Cerealist.

Some idea of the practical value of cereal research work through the two-crop-a-year system may be seen from a comparison with what is now possible and the history of Marquis wheat. From eight to ten years of research prior to 1903 resulted in the development of the first head of Marquis bearing 60 kernels in the year. From that single head by 1918 a trade crop production of upwards of 200,000,000 bushels had developed. Had the cereal greenhouses been in operation during the preliminary development period, Marquis would have been ready for distribution to Canadian farms at least four years earlier, and this would have meant many millions of dollars to Canadian farmers during a period of bumper crops and record prices.

In the case of the crop which will soon be ready for harvest, the seed from first test plots harvested in the fall, was sown last October, and the seed from the greenhouse crops will be planted in field plots in May. The number and variety of individual types of grain which are developed in the greenhouse winter crop is really amazing.

### Railroads Solve One Problem

#### Use Radio For Signalling On Long Freight Train

Railroads, which have been trying to find a more suitable and reliable manner of instant communication between front and rear cars of long freight trains, other than the present method of signalling with the whistle, apparently have solved the problem by the development of a short wave radio apparatus.

Low powered telephone transmitters installed in both ends of a train will permit the flashing of orders instantly and also make possible communication with a moving train. The signalling apparatus consists of low powered short wave transmitting and receiving equipment adjusted so that the engineer or conductor desiring to signal or converse, need only depress a switch, which in turn automatically signals the trainman.

This development marks another utilization of radio possibilities and demonstrates how indefatigable are the rail carriers in experimenting with new devices in order further to improve their services and to protect their passengers.

Men, like tools, are useless when they lose their temper.

The Lesser Evil

"Leave off—leave off—I would rather you called the police!" Hummed, Timbony.

W. N. U., 1884

### May Prove Very Useful

#### New "Electric Ear" Could Analyze Noises Of Cities

A portable "electric ear" to separate the various sounds of a whirling electric motor was demonstrated publicly recently at the Westinghouse Research Laboratories, East Pittsburgh, Pa., U.S.A., by J. P. Foltz, who developed it.

So compact that it fits into an ordinary suit case, this new "electric ear" can easily be taken to whatever sound may be under observation. In line with the studies of various cities in an attempt to reduce the objectionable noise which it is said, are gradually making nervous wrecks of the human race, the first step is to analyze the noise and find the parts which make it up.

"Noise is a queer phenomenon," said Mr. Foltz. "It is usually made up of various smaller noises and is seldom found in the pure state. When an apple is dropped on a wooden floor, the 'thud' which strikes the human ear is made up of a great number of sounds having no more resemblance to the 'thud' than flour, milk, baking powder, butter and eggs have to a finished cake.

"When the apple hits the floor, the impact starts a series of complex 'soundwaves' which in physics are represented by waves, called sound waves. It is entirely possible to produce silence by two sound waves which fit into each other much like the teeth of two saw blades.

"In a somewhat different application it is also hoped that in the future this new portable 'electric ear' may be used as an advance fault finder for aeroplane motors and propellers. So much more sensitive than the human ear, it is anticipated that it will hear those whistling piston-ring main bearings, warped or split propellers long before they are bad enough—and consequently dangerous—to be heard by the human ear."

### Bird Sanctuaries In Canada

#### Protection Of Wild Life Has Found Worth While

Conservation of wild birds in Canada was assumed by the government when there was still a good deal of unexplored wilderness and few species were threatened with extinction, the New York Times points out. One naturalist is well known from coast to coast for his preserve where wild geese and ducks are fed and protected. In the Dominion there are more than forty bird sanctuaries. On the north shore of the Gulf of St. Lawrence there is a chain of ten islands where sea birds breed without molestation. A census taken in 1920 showed their number to be 100,826 of sixteen different species. This did not include 'young birds hatched during that year.' The increase since 1920 was estimated at nineteen per cent.

Many farmers in Japan are taking up weaving at home as a side issue.

### FESTIVAL OF ENGLISH DRAMA

Malvern, Worcestershire, England. Here, in the beautiful west country town, hard against the Welsh border, will be staged from August 3 to 22, inclusive, the annual festival of English drama. To George Bernard Shaw (right), world-famed author and playwright, will be dedicated the 1931 festival. Sir Barry Jackson (left), British millionaire and theatrical producer, is directing the event, which will include a new play by Shaw. From the Malvern Hills long ago, a beacon told twelve counties of the approach of the Spanish Armada.

## Question Of Farming On A Large Scale As Against Survival Of Smaller Individual Farms

The past couple of years, with their altered markets and low prices, have forced Canadians to give attention not only to their own farming methods, but to those of other countries. Russia and the Argentine have both entered the market which Canada had come to consider largely her own, and Canada is coming to realize that if she is to remain one of the major wheat-exporting countries of the world she must do something to reduce the cost of production. The United States, which has a home market for all but a relatively small fraction of its output, can, if it chooses, limit its crops and withdraw from the world wheat market altogether. Some have suggested that Canada do the same. But wheat bulks much more largely in Canada's production and in Canada's exports than it does in the exports and production of the United States, and it would be a far more difficult and far more serious thing for Canada to admit that she is beaten in the contest than for the United States to do this. Besides, Canada has advantages which the United States can not boast. She has cheaper land, she can grow larger crops, and she can grow wheat of a better quality.

Canada, for several reasons, must go on producing wheat in the United States to do this. She needs her wheat exports to balance or help to balance the great quantities of goods she imports. She has organized herself as a wheat-producing wheat-exporting country, with elevators, railroads, docks and canals for the transportation of the product. And she has large areas of land which can not profitably be turned to any other purpose.

But necessities of the situation such as these are not going to solve the problem. Dr. W. W. Swanson, who was one of Mr. Bennett's expert advisors on wheat at the Imperial Conference, has estimated that the average cost of producing a bushel of wheat in western Canada is 78 cents. Number 1 Northern wheat sold on the Winnipeg Exchange recently for less than 60 cents a bushel. A condition of affairs like that can go on for a year or two, but can not continue indefinitely. The farmer can only continue to produce wheat by producing it at a profit. In the Argentine, wheat is produced on farms of great size by means whose standard of living is low. In Russia, it is being produced on communal farms by people whose standard of living is also much lower than that which prevails in Canada. Russian wheat also has been forced upon the market at ruinous prices in order to create a credit to

meet Russian obligations. But that was a device to meet an emergency, and need not be expected to continue. Canada will, however, have to meet the low-priced Argentine and Russian grain on the world market. How can she do it?

Some men who have studied the situation like Mr. H. E. Spencer, who represents Battle River in the House of Commons, believe western Canada must turn to large farms on the Russian scale—in other words, must industrialize farming. Others see no advantage in enlarging farms beyond the size which will give the maximum employment to the best type of modern machinery. Others again, like Hon. W. R. Mowbray, former minister of agriculture, are inclined to believe the small farm will survive. The economies of the situation will, or course decide in the end. If the small farmer can not make a living, the small farmer will not remain. He will disappear, just as the small manufacturer has, to a large extent, given way to the great factory, and as the small shipkeeper is now retreating before the chain store, and the department store. But Canada, in her own interests, would do well to take what steps she can to save the small farmer from the fate which many believe is threatening him. The small farmer is the foundation on which this country rests. Capitalist and laborer in one, he is industrious, frugal and independent, and we can ill afford either to allow his standard of living to be reduced, or to turn him to a mere workman on a large wheat-growing estate. There is probably not very much danger that Communist ideas will prevail on this continent. But the principal bulwark against them is the small farmer who owns his own land and in his own boss and can see no advantage in the socialization of either his property or his labor. —Vancouver Province.

### Canadian Poultry For Africa

#### Shipment From Nanaimo, B.C., Going To Natal

"It's a long way to Mool River," crowed six frisky white leghorn cockerels on the railway platform at Nanaimo recently. It was their first transfer on a 50-day journey from the farm at Westholme, Vancouver Island, where they were raised. They were bound for Vancouver and across Canada to Saint John, New Brunswick, from where they will be shipped to Durban, South Africa. At Durban they will be trans-shipped to the government rail railway to Mool River, Natal, where they will take up permanent residence. The birds are to provide a change of blood and to be used for foundation purposes by a Natal poultryman. Shipments of poultry from the same farm have recently been made to the British Isles, the Orient, Hawaii, several parts of Canada, and the United States.

### Canadian Tree Seed For Britain

The Forestry Commission of Great Britain is using Canadian Sitka spruce seed to a considerable extent in the planting of new forests in that country. The total quantity of seed of this species sent to Great Britain up to date by the Forest Service, Department of the Interior, is over eleven thousand pounds (five and a half tons). This seed has all been extracted at the seed-extraction plant of the Forest Service at New Westminster, B.C.

**Feeding the Sow**

(Experimental Farms Note)

The feeding of the sow during the suckling period must of course be more liberal than at any other time in order to ensure a good milk supply taking it for granted that the brood sows have been selected somewhat from the standpoint of good milking ability. Sows not liberally fed when they are nursing littered but heavily in body weight and their pigs do not attain the size they should have at weaning time. The amount to feed will depend on the size and condition of the sow, and the number of living pigs in the litter. Sows suckling large litters require more feed than those suckling small ones.

At the Dominion Experimental Station, Lacombe, the first feed for the sow after farrowing consists of a warm slop composed of bran and water. During the first three or four days great care is taken not to overfeed both as to quality and quantity. The ration is increased gradually with the idea of stimulating the milk flow of the sow as rapidly as the litter is strong enough to take it. Usually the sow is on full feed at the end of ten days.

The meal ration fed the sows during the suckling period consists mainly of home-grown grains and is made up of oat chop 200 pounds, barley chop 100 pounds and bran 50 pounds, supplemented when possible with a limited quantity of sweet skim-milk. Sour skim-milk or sour buttermilk should never be fed to a sow nursing a litter as it has a tendency to cause digestive disorders in the young pigs. In the event of sweet skim-milk not being available, tankage up to ten per cent of the ration is fed. The bran in the ration at this time is especially valuable as it keeps the sow from becoming constipated, a condition which must be guarded against if she is to produce a good, vigorous, healthy litter. A constipated condition in the sow invariably causes heavy losses in the young pigs, and those that survive tend toward being stunted and thick as they develop. The addition of bran to the ration is no so essential if the sow and litter have access to good pasture.

It is essential that the young pig have plenty of exercise. If they are confined to a small pen there is a danger of some of them becoming fat and dying from thrombosis, or other diseases. The practice followed at Lacombe is to turn the sow and litter out for a short time each fine day, after the second week. When it is

**LOCAL & GENERAL**

Scratch Pads may be obtained at the Pioneer Office, 2 for 5 cents.

A number of local masons will visit Zealand Lodge this evening.

Eubank Bros. shipped two carloads of fat cattle last Friday.

Miss Margaret Hardy, who spent last week with her sister at Turner Valley returned home on Saturday.

El Myers, of Crossfield has 45 acres of spring wheat that is up between two or three inches and doing well.

Miss Anna Munster, who has been living at Los Angeles has returned to Didsbury and is visiting with her sister, Mrs. A. Fisher.

St. Cyril's W.A. held their annual Easter bazaar on Saturday afternoon, and business men's supper held in connection were both well patronized.

Mr. H. W. Morgan left today for Winnipeg, where he will attend the Postmasters Convention as representative of the Alberta Postmasters Association, of which he is president.

Mr. E. M. Böttger, who is operating a silver fox ranch in Lucken-were reports he has three new litters of pups up to the present. He is expecting at least nine litters this season.

Rev. W. J. Archer, who has been in charge of St. Cyril's Church, has been transferred to Calgary and left this week to take up his duties at that point. His successor here has not yet been appointed.

The condition of Stainer's "Emulation" by Western United Church Choir on Sunday evening at Knox Church was well appreciated by the large number of people in attendance. Both the soloists and choir are to be complimented on their excellent interpretation of the sacred cantata.

Excellent progress is being made on the \$200,000 building which will house the World's Grain Exhibition and Conference at Regina in 1932. Preliminary work on the site has now been completed, a large amount of concrete work done and the steel framework is now being raised. The contractors state they are well in schedule. When the building is completed, about July 1st of this year, it will be turned over to the national Committee of the World's Grain Exhibition and Conference, and J. O. Linnette, Dominion Exhibition Commissioner will at once commence the work of interior decoration.

Too cold outside, the litters are turned together in the alley of the piggery where they get considerable exercise playing about.

When about three weeks of age the young pigs will have learned to eat. At this time they are fed by themselves in a crop away from the sow. Then they are fed a ration of equal parts of finely ground oat chop and middlings supplemented with a small quantity of skim-milk or buttermilk. The meals on young pigs are cheaper than on older ones and it pays to start them well. The pigs are weaned at eight weeks of age.

## Youths Sentenced For Theft of Rum at Olds

On a charge of stealing a bottle of rum from the C.P.R. depot at Olds on Saturday, April 10th, laid by Jas. Murray, chief investigator for the C.P.R., Dante Miller, Francis A. Griffin and Roy Patmore appeared before Geo. C. Peattie, J.P. on Saturday last. Griffin and Patmore pleaded guilty; Miller, who was defended by A. C. Bury, of Olds, pleaded not guilty. Mr. Mitchell, of the C.P.R. prosecuted.

After a trial lasting all afternoon, Griffin and Patmore were given one year's suspended sentence and Miller six months in gaol. Mr. Bury gave notice of appeal on the part of Miller and bail put at \$250. Constable Walter Dobbin, A.F.P. had charge of the case.

## She Believed Everything She Read

"Say it with flowers—by telegraph" may be a splendid slogan for up-to-the-minute city telegraph offices, but according to Hornepayne's telegraph clerk in the Canadian National offices there it has its difficulties when accepted too literally by residents of these frontier towns. The door of the telegraph office opened one morning recently to admit a buxom Indian lady bearing in her arms a flowering geranium growing in what had once been a ten-pound lard pail.

"You send flowers by telegraph?" she demanded of the telegraph clerk. "My girl sick in hospital Toronto, I want send her this flower. How much?" and from some hidden recess in her clothing the Indian lady produced a small roll of greasy currency and began to peel off a dollar bill.

Explanations of what florists' telegraph service meant, with the added

information that as Hornepayne did not possess a florist among her merchants it would be impossible to fulfill her request, brought no change in expression to the stoical countenance of the equaw. Finally the clerk gave up the attempt to explain. He assured the lady that though the identical geranium would not be delivered, a similar one would—and out of the goodness of his heart telegraphed to a friend in the company to buy a geranium and send it to the hospital patient. And the Indian lady left the office marvelling at the White Man's magic, more particularly efficacious since the telegraph clerk declined to accept any of the bills from that carefully guarded roll.

The trans-Atlantic speed runners between the ports of Liverpool and Saint John, was broken recently by the arrival at the latter port of the Canadian Pacific liner Duchess of York, after a crossing from Liverpool which took six days, 22 hours and 14 minutes. According to local shipping men this is the first time in the history of the port that a crossing has been made in under seven days.

## Farm Boys May Join As Boy Scouts

Saskatchewan Commissioner Outlines Plan To Teach Scouting To Boys

Any boy in the province can now belong to the Boy Scouts and have the advantage of Scout training, even though he may live a long distance from town or the nearest Scout Troop, according to a plan which is gradually being put into operation by W. J. P. Selby, assistant Provincial Commissioner for the Boy Scouts in Saskatchewan.

Mr. Selby believes that by a system of correspondence, with the co-operation of adults known to the individual boys, it will be possible to give Scout training to every boy in the province between 12 and 18 years of age, who wants to be a scout. Already a number of boys have been enrolled under the plan and are known as "Lone Scouts", and, according to Mr. Selby, reports on these coming into provincial headquarters at Regina, fully justified proceeding with the plan.

Many of the Scout proficiency badges could easily be earned by these boys, and it is believed that in earning them the boys will find wider interests right on the farms that are their homes, and that they will be happier, keener boys as a result. A few of the many badges in this class are the gardener, horseman, ambulance, dairyman, farmer, pathfinder, poultry and stockman's badges.

In addition to these specialized interests, Mr. Selby pointed out that a Scout learns to recognize and know by name trees, flowers, birds, and animals. He learns how to build his own fire under any conditions, cook his own meals, construct shelters, make his own bed from natural material and in short, to rely on his own resources.

The "Lone Scout Movement" has been started in recognition of the fact that the majority of the boys in Saskatchewan do not live where they can join regular Scout troops, nor where they could get a Scoutmaster to look after one. Under the "Lone Scout" scheme, experienced leaders will keep in touch with such boys through personal correspondence, and when possible, personal visits. In special cases, permission will be granted to organize "Lone Patrols" of from five to eight members, including a Patrol Leader.

## Those Old Clothes

Cast-Off Clothing Should Be Given To The Needy

Thousands of persons have hanging in their closets old clothes they will never wear again. These clothes ought to be kept some needy persons warm.

What about you? You are almost sure to have in your closet a suit or a dress you hated to throw away but which you will never use again. Shoes likewise and also hats that you never going to wear. San Francisco Chronicle.

Douglas' Egyptian Liniment is an excellent leg wash for stroke. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

## Manufacturing In The West

Figures Would Indicate Economic Development Within Recent Years

J. M. Davidson, managing secretary of the Industrial Development Board of Manitoba, pointed out in the course of an address in Montreal recently, that industrial production in Alberta exceeds \$100,000,000 annually; in Saskatchewan, \$90,000,000; and in Manitoba, \$165,000,000. There are \$16,320,000 more capital invested in Manitoba's manufacturing industries, he added, than in all the livestock, poultry, dairy and machinery in the province, and Manitoba's manufacturing output last year was more than double the combined western returns from dairy products, field crops (exclusive of grain), poultry and honey.

## Advertising Educates

Advertising is essentially educational. It lifts men's mind out of things. It creates a desire for things. It spurs ambition and generates energy. It has walked hand in hand with progress in our time, and even a step ahead.

Here's another attractive

**MAGIC**

Most women find it difficult to think up new ideas for attractive menus. This one, suggested by Miss Katherine M. Caldwell, cookery authority of Canadian Home Journal, Toronto, is therefore sure to please.

**LUNCHEON MENU**  
Cheese and Vegetable Soufflé with Cream Sauce  
Buttered Whole Wheat Toast  
Sweet Pickles  
Hot Raspberry Brûlée\*  
Chrysanthemum Tea

For afternoon tea, there is nothing nicer than this same Raspberry Brûlée, shaped daintily with a tiny edible jelly, buttered and served piping hot, with a cup of perfect tea.

Miss Caldwell says: "Magic Baking Powder is easy to use because it is uniform, high quality never varies. I use and recommend Magic because my experience has proven that it always gives consistently better baking results."

Look for this mark on every tin. It is a guarantee that Magic does not contain alum or any harmful ingredient.

Try Miss Caldwell's Recipe for \*RASPBERRY BISCUITS

8 cups flour  
4 teaspoons Magic Baking Powder  
1 teaspoon salt  
2 tablespoons sugar

4 tablespoons shortening  
1 cup milk  
4 tablespoons of sugar  
Raspberry jam or syrup

Mix and sift the dry ingredients. Cut the hard, cold shortening into them with a knife, using a quick, short, chopping motion; or reduce the hard cold fat to tiny particles with a pastry blender or a steel-pronged fork. When the mixture resembles a very coarse meal, add the liquid, mixing quickly and lightly. Turn out the dough on a slightly floured board; pat it down like a roller or roll it to a thickness of about one inch. Shape with a small cutter or cut in squares with a floured knife.

Dip the small lumps of sugar into syrup from canned or fresh raspberries. Press a lump into each biscuit, forcing it well down into the dough so that it will not run down the sides when baked.

Place the biscuits on a greased pan or baking sheet and bake in a very hot oven, 450° F., 12 to 15 minutes.

Made in Canada  
Good

**MAGIC**  
Baking Powder  
ensures better baking results

## Does Not Appear Weak

Lightning Strikes Which Split Great Rocks Compet Respect

A 5,000,000-volt stroke of lightning having been caught and measured on an electric line in Arkansas, the scientists state that it is considerably weaker than machine-produced electricity.

This conclusion may satisfy electricians of note, but the ordinary man should beware of riding with lightning when it is raging about. Strokes that split great rocks, hit and raze big buildings and wipe out herds of cattle, are quite capable of disposing of a mere man in astonishingly quick order.

Lightning is a natural force that compels respect.

Persian Bath: the poetical as to loveliness. Delightfully fragrant. Daily to use. Leaves the skin soft. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chafing. Keeps skins soft and velvet-textured. Unrivalled for charm, distinction and refinement. Used by lovely women everywhere to preserve and enhance their natural beauty.

## Doctors Donate Millions

Investigations show that the medical men in the United States give away a sum of \$205,000,000 annually by donating their services to people who cannot or do not pay. On this basis of reckoning the medical fraternity in Canada must be giving away annually some \$30,000,000. Their critics have no such record of philanthropy to show.

**Aching CORNS STOP HURTING INSTANT RELIEF!**

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless. Thousands use this wonderful remedy, and say it is the best. Don't suffer any longer. Use Putnam's Corn Extractor, the one sure relief for corns. Sold at every drug store. See

**PUTNAM'S**

## Atmosphere Of Earth

Hundred Miles Deep

But Sun Has Atmosphere Depth Of 9,000 Miles

New discoveries about the sun's atmosphere have been disclosed to Dr. Albert Einstein at the Mount Wilson Solar Observatory, Pasadena, California, by Dr. Charles E. St. John, of the Carnegie Institution, of Washington. The sun's atmosphere is 9,000 miles deep, compared with the 100 mile depth of the earth's atmosphere. The outermost layer of the earth's atmosphere is composed of the lightest gases, helium and hydrogen. The sun's atmosphere is quite different, the outermost layer being of ionized calcium, forty times heavier than the layer of hydrogen 3,000 miles closer to the sun.

In the earth's atmosphere the first seven miles from the earth form a layer in which wind storms occur up to a velocity of 200 miles per hour. At 35 miles up, argon, one of the constituents of air, disappears. Further up there is no more oxygen, and at 70 miles nitrogen disappears, leaving only helium and hydrogen for the last thirty miles.

For Both House and Stable. There is a good deal of similarity, physically speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and ailments in both human beings and the lower orders of animals.

## An Ever-Present Menace

Carbon Monoxide Gas Most Treacherous Because No Warning Given

A recent bulletin issued by the Roads Department of the Province of Quebec, contains an important reference to the danger created by the presence of carbon monoxide, a menace all the greater because it may extend even to an automobile in motion. The note is well worth careful perusal by all motor drivers. Carbon monoxide is a colorless, tasteless, practically odorless gas, and is without any irritant action on the mucosa of the respiratory tract. Because of these properties, it is impossible to detect it by any of the five senses. It is, therefore, a most treacherous gas, since it can be present in dangerous quantities without giving any warning whatever.

Britain expects a record pleasure-boating season this year.

## To Speed Up Traffic

Horses Banned From London Street During Certain Hours

For the first time in the history of London, horse traffic is to be forbidden to one of the city's principal streets.

The ministry of transport has announced an experimental scheme operative during the coming spring by which Oxford Street, one of the great east and west thoroughfares, will be closed daily at all slow moving traffic, including horse-drawn vehicles, between noon and 7 p.m.

Worms sap the strength and undermine the vitality of children. Strengthen them by using Mother Graves' Worm Expeller to drive out the parasites.

## Nobody Wants War

Mussolini doesn't want war. Japan doesn't want war. France doesn't want war. The United States abhors war. It might be well to watch Switzerland. Toledo Blade.

**"Do Not Hesitate to Try It"**

"Your Vegetable Compound is a good medicine. Anyone who is in poor health should not hesitate to try it. When I was taking the Vegetable Compound I tried the sample Liver Pills I found in the package. I have taken them every night since and I can feel myself improving. I am so thankful for the good they do me that I have told several women about it."—Mrs. G. W. Palfrey, 265 Hiram St., Stratford, Ontario.

**Lydia E. Pinkham's Vegetable Compound**

SOLE PREPARED BY LYDIA E. PINKHAM & CO. 100 N. BROAD ST. NEW YORK, N. Y.

for  
ANY CHILD

W.H. can never be sure just what makes a child restless, but the remedy can always be the same. Good old Castoria! There's comfort in every drop of this pure vegetable preparation, and not the slightest harm in its frequent use. As often as your child has a fretful spell, is feverish, or cries and can't sleep, let Castoria soothe and quiet him. Sometimes it's a touch of colic. Sometimes constipation. Or diarrhea—a condition that should always be checked without delay. Just keep Castoria handy, and give it promptly. Relief will follow very promptly. If it doesn't, you should call a physician.

**Fletcher's  
CASTORIA**

### CHAPTER XII.—Continued.

"I do," said Sonny suddenly. "I'll take you anover pie if you want one." Halliday laughed, and arose.

"I rather think my digestion won't stand for it," he replied. "And besides, I must go home and get ready for my guest. I'll come back later and find out what you hear from the nurse, Mrs. Hastings. Just now I'm waiting for my orders. It's fine to see this man of yours about again, isn't it?"

He turned away, while Sonny slid down the steps to join him, slipping his little hand into James Halliday's as confidently as he would have put it into Nick's.

"I got a coven where I bake 'em," he said sociably. "Daddy made it. Daddy can make anything. I'll show you 'fore you go home."

"Gay," murmured Nick softly, "you ought to have seen Halliday's face when the kid offered him that pie! I don't believe he ever played in his life—or if he did he's forgotten how. But it's fine of him to do so much for that little girl."

Gay didn't answer. She was watching James Halliday bending above the pile of stones that was Sonny's even. In the silence she heard her little

boy explaining: "You put 'em there first, an' then brown 'em on the tops, same as Mummy does, only me can't have matches. Daddy says mud pies don't need matches. He says they're sun-baked, an' the flavor's more 'ticious that-a-way. Some day when you got time I'll let you make one."

"Thanks," said James Halliday. "When my little girl gets better perhaps I'll teach her how to do it. I must go now. I enjoyed my refreshments very much."

"It wasn't refreshments," corrected Sonny solemnly. "It was pie. 'Freshments' is ice cream!"

Halliday laughed. "I see. I'll try not to make such a mistake again. Good-bye, little chap."

"By," said Sonny, and turned once more to his absorbing task.

Gay watched James Halliday go through the garden and into his own house. "His little girl!" she exclaimed softly. "Did you hear that, Nick? Oh, wouldn't it be wonderful if—"

Nick smiled, and said: "My dear girl, have you forgotten the Halliday's career?"

"Career!" echoed Gay with scorn. She arose, and moved toward the door. "I must go in and telephone that nurse. I tell you what, Nick Hastings, it's some career just keeping a family going! And if the Hallidays should keep that little girl—"

"You're an incurable day-dreamer," said Nick. "I'm glad you are; but— but somehow I can't just see Mrs. Halliday adopting a child. She's rather keen on the subject of inheritance, and all that. I had the feeling that she thought I'd been foolish to try to save something that was, possibly, not worth saving. Was she right, Gay? I've been wondering

"There!" broke in Gay indignantly.

"I knew someone had put that idea into your head, because such thoughts aren't really yours. They get rid of them, my dear. Just don't belong to you. Why, Nick! even the least of us has the right to life—and how can you or I, or Mrs. Halliday, know what that little girl may have to give the world?"

Her eyes met his, and in one glance swept away the seeds of Angela Halliday's careful saving.

"You're right, of course, dear," he said quietly. "You always are right. Gay, I believe you see more true and straight than most of us; and yet—it's queer, but I tell as you do until she talked to me about it. Don't stay too long at that telephone. I want you."

"You're getting spoiled," she answered, brushing back his hair with a tender hand. "I'm neglecting everything."

"That doesn't matter," said Nick, smiling up at her, "so long as you don't neglect me. I shall continue to boss the roast while you keep me in this chair. I like being spoiled."

"I'm afraid," said Gay, with a quiet little laugh, "that I like spoiling you."

### CHAPTER XIII

The summer was waning, and after three weeks at "The Bird's Nest," where he regained the life of his diminished strength, Nick was back in the cage.

Five Boys—  
Best Evidence.

Mrs. Cerepan, of Leigh, writes:—"I suffered with biliousness accompanied by sick headaches for days at a time, and every medicine I tried failed to bring relief. A friend gave me some of your wonderful Carter's Little Liver Pills and the first dose gave me great relief. For three years I have taken them every night as a regulator and I find they prevent these bilious and sick headache attacks. I have five little boys and I give them three or four every week. I have great faith in them." Take Carter's Little Liver Pills. All druggists 25c and the red pills.

"It seems good to have him there," said John Maxwell to Mary, at the close of Nick's first day, "and I believe the boy is happy to be back, possibly because we were all so glad to see him."

"I met Gay down town, too," said Mary Maxwell. "She looked rested, and pretty, and was a smart little new gown that was tremendously becoming. I was surprised to see it. Their bills must have been overwhelming these last few months."

"Possibly the dress cost a gift."

"From whom? There's not a soul who'd think of such a thing. The truth is, Johnny, I've sometimes longed to give her a gown or two myself, but I thought she might not like it. She and Janey were about as much together that I've hated to think that Gay was going without the prettiest young girl wants—and she's still a girl, you know, in spite of her little family."

"I think you might give her something now and then, Mary. Gay's not the sort who would take offense. Can't you pretend you got them for yourself and they were—well—too small or something?"

Mary Maxwell glanced down at her generous proportions, and smiled at her husband's naive suggestion.

"I fear, my dear, that Gay would see through a subterfuge like that. Johnny, do you suppose old Mr. Bartlett gives her anything?"

"It wouldn't surprise me; though clothes are the last item he would notice."

"I don't know. Those days he was here with the babies he noticed everything. He's a wonderful old man. I wish he'd give John an allowance."

"Well, I don't," John Maxwell spoke with decision. "There's nothing better for a man than having to scratch gravel to provide for his wife and children. In my opinion Nick's marriage has been the making of him. Not that he wasn't all right before; but he needed ballast, and Gay provides that in just the right amount. I shouldn't want Simon Bartlett to do too much for them."

"Well," sighed Mary, with a thought for the days when she herself had longed for the unattainable, "I suppose you're right, and possibly Mr. Bartlett agrees with you. I feel sure there's nothing he wouldn't do for them if he thought best."

This was true. It sometimes tore Simon's heart not to lift all Gay's financial burdens. Only his shrewd good sense kept him from doing it. He had, however, taken care of the bills incurred by Nick's illness, saying when Gay protested, "It's only a loan, dearie. Better owe me than the doctor. He needs it more'n I do; and Nick can pay me back any time it comes handy."

"But I've the hundred dollars you gave me, Uncle Sam. That'll pay some of it. I can't go into debt to anyone, you know, and spend the money for silly clothes."

"I ain't askin' you to spend it for silly clothes, dearie. Clothes ain't silly if they make a woman look right to her man. It ain't often I give a present and tell folks just what they got to do with it. That ain't no way to give; but this is different. Run along now, and do your shopping. If you don't, I'll do it for you, and there's a knowin' what outrageous flimsies I might buy."

Hence the smart little gown that

W. N. U. 1984

had caught Mary Maxwell's approving eye, and which also caught Nick's when Gay appeared at the bank that afternoon.

"Where'd you get it?" he questioned through his little window, for once unkind of the fact that Sonny was begging for admittance. "You look a peach. I bet you've overdone your account—and I don't care a darn if you have. If there weren't so many people round here I'd—"

"No love making allowed in banking hours," came from the next cage, as Johnny Symmes caught the drift of Nick's remarks. "How do you manage to get him going like that after all these years, Gay?"

Gay laughed. "The recipe's simple. Get a new gown and spring it on your man unexpectedly. You tell that to Flora."

"Nothin' doin'," said Johnny, smiling broadly. "Flora doesn't need any urging to buy new gowns. Run along, Gay. We need the services of our paying teller, and he's still spellbound. Not that I blame him. You look a regular corker this afternoon."

(To Be Continued.)

### Soviet Farm Movement

Development Of Farms To Be Intensified In Russia

Soviet Russia is going "back to the farm," according to figures just issued by the government. During the last ten days in January and the first ten in February, a total of 756,000 families joined the collective farms, the figures show. This migration is the greatest in history. Development of these farms has always been the backbone of the Soviet movement.

Most of the families who have applied to join the movement came from the Ukrainian republic, the North Caucasus, the upper and lower Volga and the German republic. They were expected to move to the farms gradually during the spring time to get next season's crops planted.

### "Stop" Signals For Speakers

Automatic signals of the type familiar to motorists were used to flash a warning to speakers talking more than their allotted time at a dinner given by the National "Safety First" Association at the Vintner's Hall, E.C. in honor of the Royal Commission on Transport.

### Better Than King Canute

The bridegroom was in a poetic frenzy as he strolled along the seashore. "Roll on, thou deep and dark blue ocean, roll!" he recited to his bride.

"Oh, Gerald," she exclaimed "how wonderful you are. It's doing it."

## BACKACHE

Wonderful relief from pain

Backache is one of those wearying complaints which find all their victims together with a common band of misery. And when any one suffers from backache finds a sure remedy, fellowship prompts the quick report that discovery to others. Here's a woman who has her friend to thank for knowledge of a remarkably successful treatment. Now gratitude compels her, in turn, to pass along the good news to you.

"I am writing to tell you of the great benefit I have received from Kruschen Salts. My friend, Mrs. H., had received so much benefit that she begged me to give Kruschen a trial, although at first I was doubtful, because I had tried so many things. At last, however, I tried some of her Kruschen, and, feeling hopeful, I purchased a bottle, and I can honestly say that before I had finished the bottle my backache was gone. I have suffered for years with kidney trouble and dreadful headaches, and now to be free from the pain altogether is wonderful!" (Mrs. C.)

### FREE TRIAL OFFER

If you have never tried Kruschen-salts it is now at our disposal. We have distributed a great many small "GIFT" packets which make it easy for you to secure our claim for yourself. Ask your druggist for the new "GIFT" 75c packet.

With a coupon of our regular 75c bottle together with a separate trial bottle—worthful for about one week. Open the trial bottle first, put it in your Kruschen, and we will claim to do it. We Kruschen does everything entirely convinced that regular backache will go away. "Backache" back. Your druggist is authorized to return your 75c bottle immediately with your Kruschen. You have tried Kruschen first, at our expense. What more can we say? Handled by E. C. Hughes, Ltd., Manchester, Eng. Distributors in Canada: McMillan Bros., Ltd., Toronto.

### Little Helps For This Week

"They helped every one his neighbor; and every one said to his brother, 'Be of good courage.'" — Isaiah xli. 6.

When no low thoughts of self intrude,

Angels adjust our rights.

And love that seeks its selfish good

Dies in its own delights.

How much we take, how little give—

Yet every life is meant

To help all lives; each man should live

For all men's betterment.

—Alice Cary.

Every human being whom we approach

should be the better for us—

William Ellery Channing.

Each of us is bound to make the same

small circle in which he lives better

and happier; each of us is bound to

see that out of that small circle the

widest good may flow.

—Arthur Pearson Stanley.

Talkies in German have been

banned in Poland.

"Dry" ice is to be introduced into

Australia.

## ASPIRIN

TRADE-MARK REG.

Accept only "Aspirin" package which contains precise directions. Handy "Aspirin" boxes of 12 tablets. Also bottles of 24 and 100—All druggists.

(Made in Canada)

## ACID after meals

GET RID of your dead of pain after eating. Eat without fear of indigestion, sour stomach, disagreeable gas or headache.

When your food ferments, "dis-agrees," lies like a lump in your stomach, it's a sign of too much acid. You need not resort to crude methods—take instead an anti-acid that will correct the condition. Phillips' Milk of Magnesia.

A spoonful of this pleasant-tasting, soothing fluid neutralizes many times its volume in acid. It restores the proper alkaline balance to an acid-

soaked stomach and bowels—assists these organs to function as they should.

Phillips' Milk of Magnesia is what you need when a bad breath, coated tongue, headache, nausea or biliousness indicates an over-acid condition. Take a spoonful today and for several days and see how it sweetens the system. You won't be nearly so liable to colds or sickness. All druggists in the Dominion sell it in 50c bottles.

Genuine Milk of Magnesia is always a liquid—never a tablet. Look for the name Phillips on the bottle.

## Montreal Symphony Orchestra On Air

This is the Montreal Symphony Orchestra which will broadcast a radio program from every Saturday between noon and 2:30 p.m. P.S.T., starting Saturday, Feb. 21, over the network of the Canadian Pacific Railway Company's telegraph line from Winnipeg to Halifax. It will play symphonic concerts of a very high order, and the conductor, Mr. Douglas Clarke, Dean of the Faculty of Music, McGill University, (Montreal) has drawn up a series of programmes which will be representative of three centuries of music.

The programmes will be chronological in character and each will be representative of music written between the 16th century and the present. They will begin with a series of pieces by Bach, Handel, Beethoven, Mozart, continuing with Brahms and Bruckner, then to the 19th century, including Tchaikovsky, and concluding with the moderns. English composers will be prominent

in the concerts, including such moderns as Elgar, Holst and Vaughan Williams, while an early English Tudor composer will also be heard.

In this way the concerts will be representative of the best in music for the last three centuries, in which the art of composing reached its height, and every listener following the ten programmes already projected will acquire a knowledge of music which it would take the ordinary concert goer years to get, apart from the enjoyment of listening.

The Montreal Symphony Orchestra has earned high praise from critics, and its range of subject matter as well as its perfection in technique is remarkably well known. The concerts will be broadcast from Tudor Hall, in Montreal, and are made possible by the Canadian Pacific Railway.

### Melvin Notes.

Miss Mildred Brown spent the week end in Calgary.

George and Gerald Gibson spent the week-end with the Johnstons.

Mr. and Mrs. Rands spent Sunday evening with Mr. and Mrs. E. Krebs.

Mr. and Mrs. Krebs, Mr. and Mrs. Esler and Mr. O. O. Swingle visited in Calgary on Friday.

Miss Dorothy Ranton, Margaret Geizer, Joyce Mayle and Ormond Phillipson spent Sunday at Mr. and Mrs. J. Clarke's.

Miss M. Weart, of Calgary spent the week-end with Mr. and Mrs. Youngs and is now visiting with Miss Dorothy Youngs at Emmerdale.

While saving wood last week, Randol Johnston had the misfortune to get his thumb in the saw. He is sure lucky not to have lost his whole hand. The wound is healing nicely now. It is our fortune to have a good nurse in the district.

The paper that was given to all members of the club on Saturday night was indeed good. This paper is being typed by Miss Marion Fisher. Any person requiring a copy, please write or call to Mrs. Youngs. Proceeds of the paper will be turned over to club funds. Price 25c. each copy. Everyone buy a copy. The club takes this opportunity of thanking Miss Fisher for her work.

Sunday being Dorothy Youngs' birthday, a number of friends drove to Emmerdale and spent the day with her. Every person seemed to be in their happiest mood, wishing her many happy returns of the day, inspecting her gifts and teacherage, not forgetting her cupboard. All were enjoying and doing just to the sumptuous turkey dinner served by the hostess, when suddenly one of the party looked at his watch and informed us he had orders to be home early with the car (ask Edgar and Ross why).

On account of spring work opening up, the last meeting of Melvin "Go-Gutters" Club was held on Saturday night. At the business meeting, election of officers took place and the following were elected: President: Mrs. A. Krebs Vice-president: Edgar Wiggins Sec-treas.: Mrs. G. Youngs Advertisers: Mrs. E. Cowie Sports Convener: Rose Youngs Sports Assistant: Emil Krebs Lunch Convener: Mrs. C. Youngs The president, Mrs. Krebs was then presented by the club with a sash. From then on, after the business meeting, the remainder of the evening was spent in contests and playing games. Edgar Wiggins read a very interesting paper on the club and Miss M. Weart, who dances at Pendergast in Calgary gave an exhibition dance which was enjoyed by all. Lunch was then served and everybody journeyed homeward

believing their winter had been well spent. We hope they will all join in our summer sports as soon as the seeding rush is over.

### Mountain View Notes

Seeding operations are in full swing in the district now

The monthly meeting of the W. I. will be held on Thursday in Community Hall.

The farmers working in the field are heard complaining about the dust-storms. Previously, the ladies did most of the grumbling re their dirty windows, etc but now alas! Mr. Farmer's eyebrows look quite pencilled on his entrance into his home.

A concert and dance was held in Community Hall on April 10th. A farce entitled "Box and Cox" was played. The part of "Mr. Cox" was very ably performed by Mr. J. Winterbottom, who has shown his ability as a very talented amateur player on previous occasions. "Mr. Box" was well portrayed by Miss Doris Brown, while "Mrs. Bonner" was played by Mrs. B. A. Atkinson. Miss Minnie Gardiner, I.A.B. of Calgary played two pianoforte solos and the audience greatly enjoyed her fine rendition of two classics. Miss Mary Gardiner contributed two musical readings, "Home" by Edgar A. Guest, and "The Bogies" as an encore. Pianoforte selections were given by Miss Stella Nelson and Miss Grace Webber. Both these girls are promising musicians. The chairman for the evening was Mr. Hugh Roberts. Following the concert, dancing was indulged in, music being supplied by the Fox Horn Orchestra. Those responsible for the concert wish to express their appreciation of the help given them by several members of the W. I. also to the chairman and gentlemen who so unselfishly put up the stage decorations during such a busy season on the farms.

"In most parts of western Canada if you ask a business man as to general conditions in his locality, the answer you receive is a surprising number of instances in that they are better than people in the east seem to think and that stems from improvement are by no means wanting." This is the summary of impressions of his just concluded western tour by E. W. Beatty, chairman and president of the Canadian Pacific Railway.
